ANGOLA: A MARKET IN TRANSFORMATION

With a population of 37.9 million and a GDP of USD 96.7 billion, Angola is emerging as one of Southern Africa's most promising markets for HVAC-R, cooling and climate-control technologies. The economy recorded 4.4% real growth in 2024 - its strongest expansion since 2015 - while continued investment in housing, commercial developments, hospitality, industry, energy and infrastructure is driving growing demand for air conditioning, ventilation, refrigeration and energy-efficient HVAC solutions.

Angola serves as a strategic gateway between Southern and Central Africa.

A GROWING HVAC-R MARKET

Angola's construction industry is forecast to grow by an average of 5.9% annually between 2026 and 2029. Supported by major public and private investments in residential development, transportation, energy, water, ports and industrial projects, this expansion is driving increasing demand for air conditioning, ventilation, refrigeration and energy-efficient HVAC-R systems across the country.

ANGOLA'S ATLANTIC TRADE GATEWAY

The Port of Luanda is the country's principal maritime and logistics platform, handling approximately 80% of Angola's imports and exports. The Port of Lobito and the Lobito Atlantic Railway further strengthen Angola's position as a regional trade hub, providing access to inland markets and mineral-rich regions across Central and Southern Africa.

MEGA PROJECTS DRIVING DEMAND

Lobito Corridor

A USD 753 million financing programme is supporting the modernisation of the approximately 1,300-kilometre railway connecting the Port of Lobito with the Democratic Republic of the Congo and Zambia.

Caculo Cabaça Hydropower Project

The 2,172 MW project will become Angola's largest hydroelectric power station, creating significant demand for civil works, energy systems, machinery and engineering services.

Quilonga and Bitá Water Projects

These major production and distribution projects are designed to improve potable water access for approximately 7.5 million residents of Luanda.

Housing and Urban Development

Angola has constructed more than 350,000 homes through national housing programmes, while over 3,900 additional units are currently under construction across several provinces.

Luanda Airport Railway Connection

The Bundo-Dr. António Agostinho Neto International Airport railway corridor project reached 87.4% completion in April 2026.

OPPORTUNITIES FOR INTERNATIONAL SUPPLIERS

These investments are generating strong demand for construction materials, heavy machinery, steel, concrete technologies, electrical systems, HVAC, water technologies, pumps and valves, renewable energy solutions, safety equipment and professional project services.

 **27 -29 January 2028**

 **Luanda , ANGOLA**

WHY EXHIBIT?

- Enter Angola's heating, ventilation, air-conditioning and refrigeration market.
- Meet qualified importers, distributors, installers and project buyers.
- Present your HVAC-R and refrigeration solutions for Angola's infrastructure, urban development projects.
- Find local agents, representatives and long-term business partners.
- Strengthen your brand visibility across Southern and Central Africa.
- Connect directly with the professionals responsible for purchasing and project development.

WHO WILL YOU MEET?

- HVAC contractors and installation companies
- Property developers and project owners
- Mechanical engineers and HVAC consultants
- Importers, distributors and suppliers
- Government and public institutions
- HVAC installation companies and contractors
- HVAC maintenance, servicing companies
- Hotels and commercial property groups
- Facility managers and building operators
- Investors and purchasing professionals

MEET THE PROFESSIONALS SHAPING ANGOLA

Angola HVAC R Expo is an international business platform bringing together the full heating, ventilation, air-conditioning and refrigeration value chain in Luanda. The exhibition connects global manufacturers and solution providers with qualified buyers, importers, distributors, HVAC contractors, installers, developers, architects, mechanical engineers, consultants, facility managers, project owners and public-sector decision-makers.

Sector-focused networking, professional conferences and pre-scheduled B2B meetings.

TARGETED HOSTED BUYER PROGRAMME

The Hosted Buyer Programme will welcome carefully selected purchasing professionals from Angola and key markets across Southern and Central Africa.

Participants will be matched according to their sector, purchasing requirements and product interests, allowing exhibitors to meet the most relevant buyers through **pre-scheduled B2B appointments.**

CONNECT WITH BUYERS. BUILD PARTNERSHIPS. EXPAND YOUR HVAC-R BUSINESS IN ANGOLA.

Secure your stand at Angola HVAC R Expo and position your company at the centre of Angola's heating, ventilation, air-conditioning and refrigeration market.
